

Protect the Environment and Protect Yourself

Florida Mitigation Providers takes on the liability incurred from the mitigation process. Our service eliminates the need for the costly and time-consuming process of identifying an appropriate off-site mitigation property and having the proper agencies designate it so.

Florida Mitigation Providers, LLC is a commercial wetland mitigation banking firm headquartered in Jacksonville, Florida, that owns and manages the LOBLOLLY, SUNDEW, and TUPELO mitigation banks. These banks consist of approximately 10,000 acres throughout Duval, Clay, and St. Johns counties. The banks offer credits to satisfy both state and federal requirements. In addition to offsetting the impacts to wetlands, the mitigation banks (*shown on next page*) can also be used to preserve the habitats of endangered or threatened species such as the gopher tortoise.
